

Basic: The wielder of the augmented firearm may stand within arm's reach of a Target currently in Bleedout, make a witty quip, and spend 1 Resolve while performing a Killing Blow to call 'Killing Blow - unavoidable Infection loss. Self: No Escape, 10 minutes'. The Target will always lose at least one Infection as a result of this death, even if resurrected by a skill or item. This augment feature may not be used if the user is Fractured.
