

Basic: When using a Medical Skill to heal Body or cure a disease from a target, user may call 'disease kit, no effect' to any effect that would result in contracting a disease from the target being worked on.

Proficient: By spending 5 Mind and performing a 10 minute interview with a target infected by a disease, the vector of one disease they are currently suffering from can be determined.

Master: By spending 10 mind and performing a 10 minute Full Engagement medical procedure taking and preparing samples from a Target infected by a disease, user may make a second Target currently not suffering from the disease immune to that single disease until the next 12s (call: 'vaccinated. no effect').
